

LANDS project presented with "The Wine Story"

On the occasion of the international manifestation "Museum Night", which the Museum of the Republic of Srpska traditionally organizes for the thirteenth time this year, the idea of realization of a popular exhibition entitled "The Story of Wine" was announced. The author of this exhibition is Natasa Kovacevic, curator of the JU Museum of the Republic of Srpska. The exhibition was officially opened on 19.05. 2018. Bearing in mind that this

year's exhibition is thematically dedicated to wine, four wineries from the northwestern part of the Republic of Srpska took part in its realization: "Jungić", "Fazan", "BonaVentura" and "Podrum Panic". Given that the exhibition is an interactive type, the visitors had the opportunity to learn more directly from the present exhibitors and participants about wine and wine growing in the northwestern part of the Republic of Srpska. Bearing in mind the fact that wine production is an indispensable segment of the agrotourism activity of each region, the LANDS project (Erasmus +) implemented by the Faculty of Agriculture, University of

of Banja Luka, was presented at the event. Except for the exhibitors themselves, the project is presented to a large number of visitors, through an interactive conversation, but also through information on the promotional poster of the project. The exhibition "The Story of Wine" was opened by Tatjana Jovanović-Cvetković PhD, one of the participants in the LANDS project. The sponsors of the "Night of the Museum" event were the Ministry of Education and Culture of the

Republic of Srpska and the city of Banja Luka.
